

Brand
Introduction

Lemonderma

No.1 K-Pharmacy Vegan Dermacosmetic

To take what was stuck — and give it a way through.

Sensitive skin was stuck on a question for a long time: mild doesn't work, and what works irritates. No brand proved otherwise. Lemonderma drills through that blockage with science — efficacy delivered, barrier guarded. What's mild is really working. The data ends the doubt. For sensitive skin, the answer was always there. Lemonderma just found it.

“How can we deliver nature’s vitality to the skin with the power of science?”

We started with the pure, bright energy of Jeju Lemon exosomes.

Then we paired it with our own **Purimax™ Technology** to help your skin feel clearer, healthier, and full of life.

With gentle **vegan micro crystals** that boost absorption, every formula works like a small clinic treatment you can use at home—effective, soft on the skin, and kind to the planet.

Lemonderma isn't just skincare. It's where nature meets science, where innovation becomes easy to use, and where your skin finds a little confidence every day.

Exosome-powered skincare with Jeju Lemon
— delivering clinic-level results at home.

Where Nature Meets Science

Why Lemon?

① One Acid, One Logic

“Acidity as the Core of Skin Design”

- Citric Acid = pH balance + chelation + gentle exfoliation
- Creates a clear flow: Texture → Clarity → Natural Glow
- Few fruits can explain structural skin change this coherently

Lemon explains skin transformation through a single formulation logic.

② Optimal Skin Combination

“The Best Balance”

- Vitamin C + Citric Acid + Polyphenols
- Designed as one system, not isolated activities
- Focused on visible, feelable skin improvement

We design combinations, not ingredient numbers.

③ Lemon-Specific Antioxidant Proof

“Eriocitrin as a Scientific Marker”

- Lemon (Citrus limon) contains Eriocitrin
- Repeatedly cited as a key antioxidant marker
- Enables standardized, explainable formulation

Not a vague fruit extract — a defined ingredient.

④ Safety by Design

“Citrus Risks Are Managed, Not Ignored”

- No reliance on citrus essential oils
- Compliance with safety & regulatory standards
- Selective use of safe, effective fractions(juice / extract / vesicle)

Science-driven selection builds trust.

⑤ Why It Fits Lemonderma Best

“Lemon Exosomes & Nature Meets Science”

- Growing research on lemon-derived exosome-like nanovesicles
- Plant science meets skin biology
- Perfect bridge between nature and advanced technology

Natural origin. Scientific approach.

Why It's Safe for Daily Use

Key Active Ingredient:
Exosome-Coated Vegan Micro Crystal – 10,000 ppm

Vegan Micro Crystal
100% Vegan Crystal | Low Irritation

Conventional Spicule
Marine Sponge | High Irritation

- Typical industry concentration for comparable products (sponge-extract-based): approximately 4,000 ppm
- Our applied concentration: 10,000 ppm –approximately 2.5× the market standard
- Elevated concentration achieved while maintaining a gentle formulation suitable for daily use
- Delivers higher efficacy at the same usage frequency

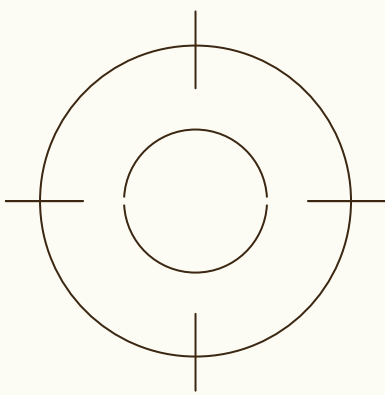

LEMON EXOSOME

100M Particles

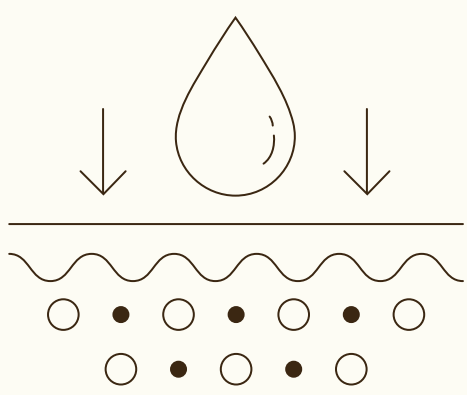

ANTI-AGING BOOSTER

What is an Exosome?

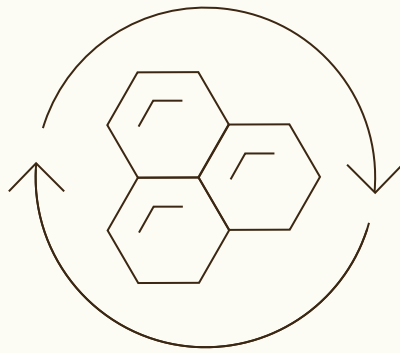

Tiny cellular messengers (30–200 nm) deliver a rich blend of proteins, nucleic acids, and lipids directly to your skin.

Targeted Efficacy

Perfect Compatibility

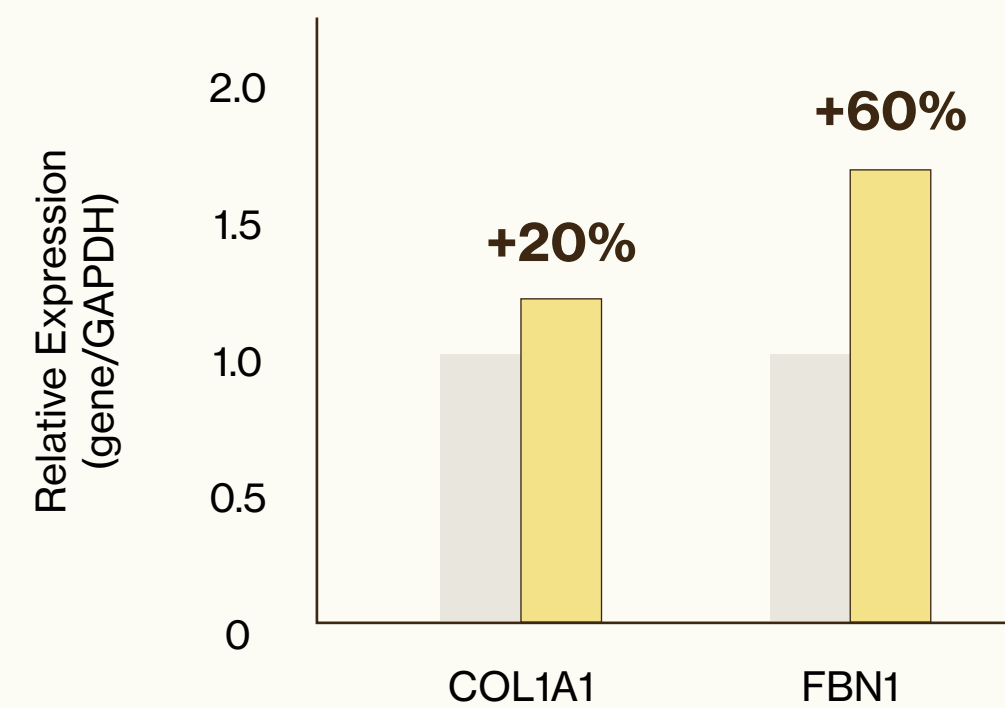

Regenerative Power

Lemon Exosome (Phyto-Actosome®)

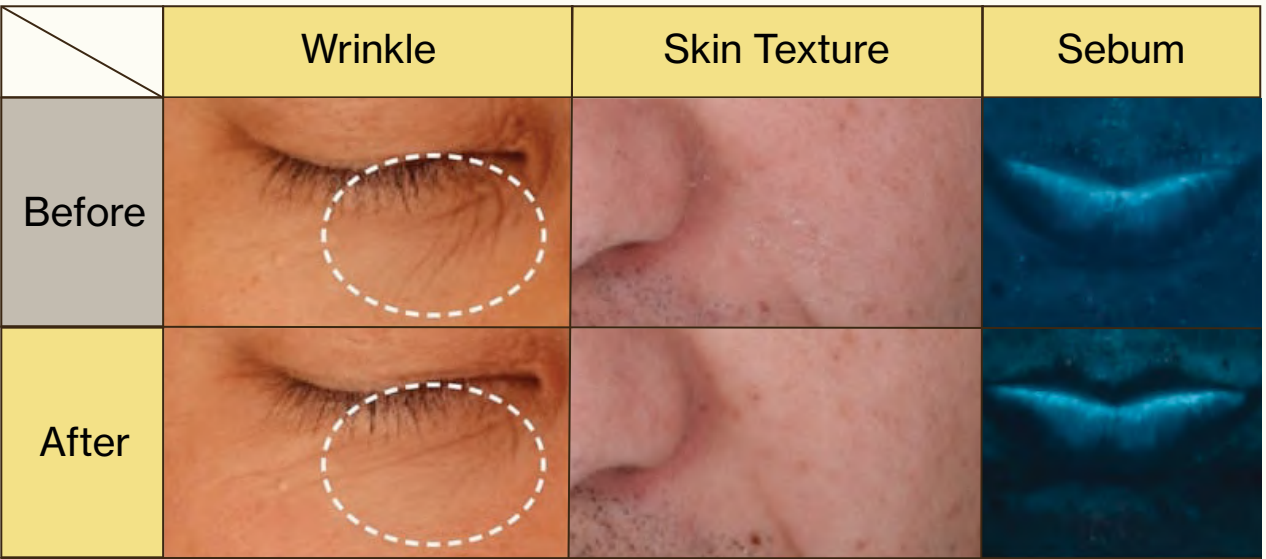

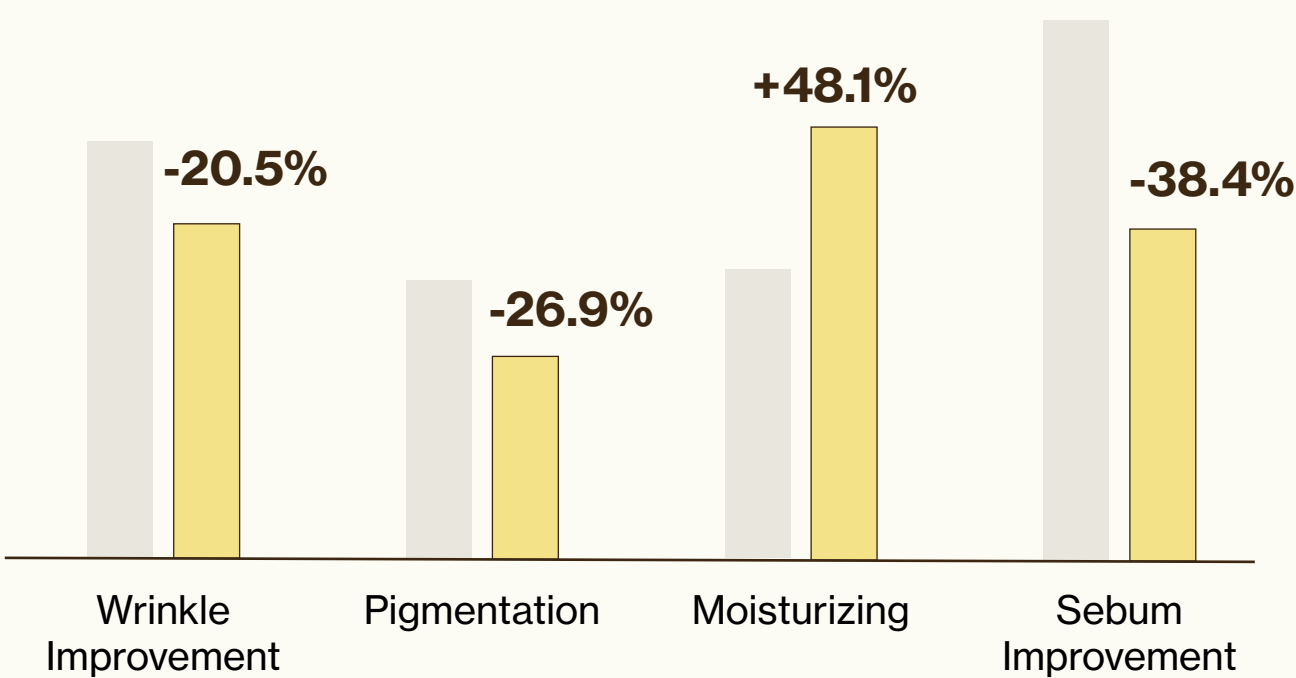

Boosting Skin’s Structural Proteins

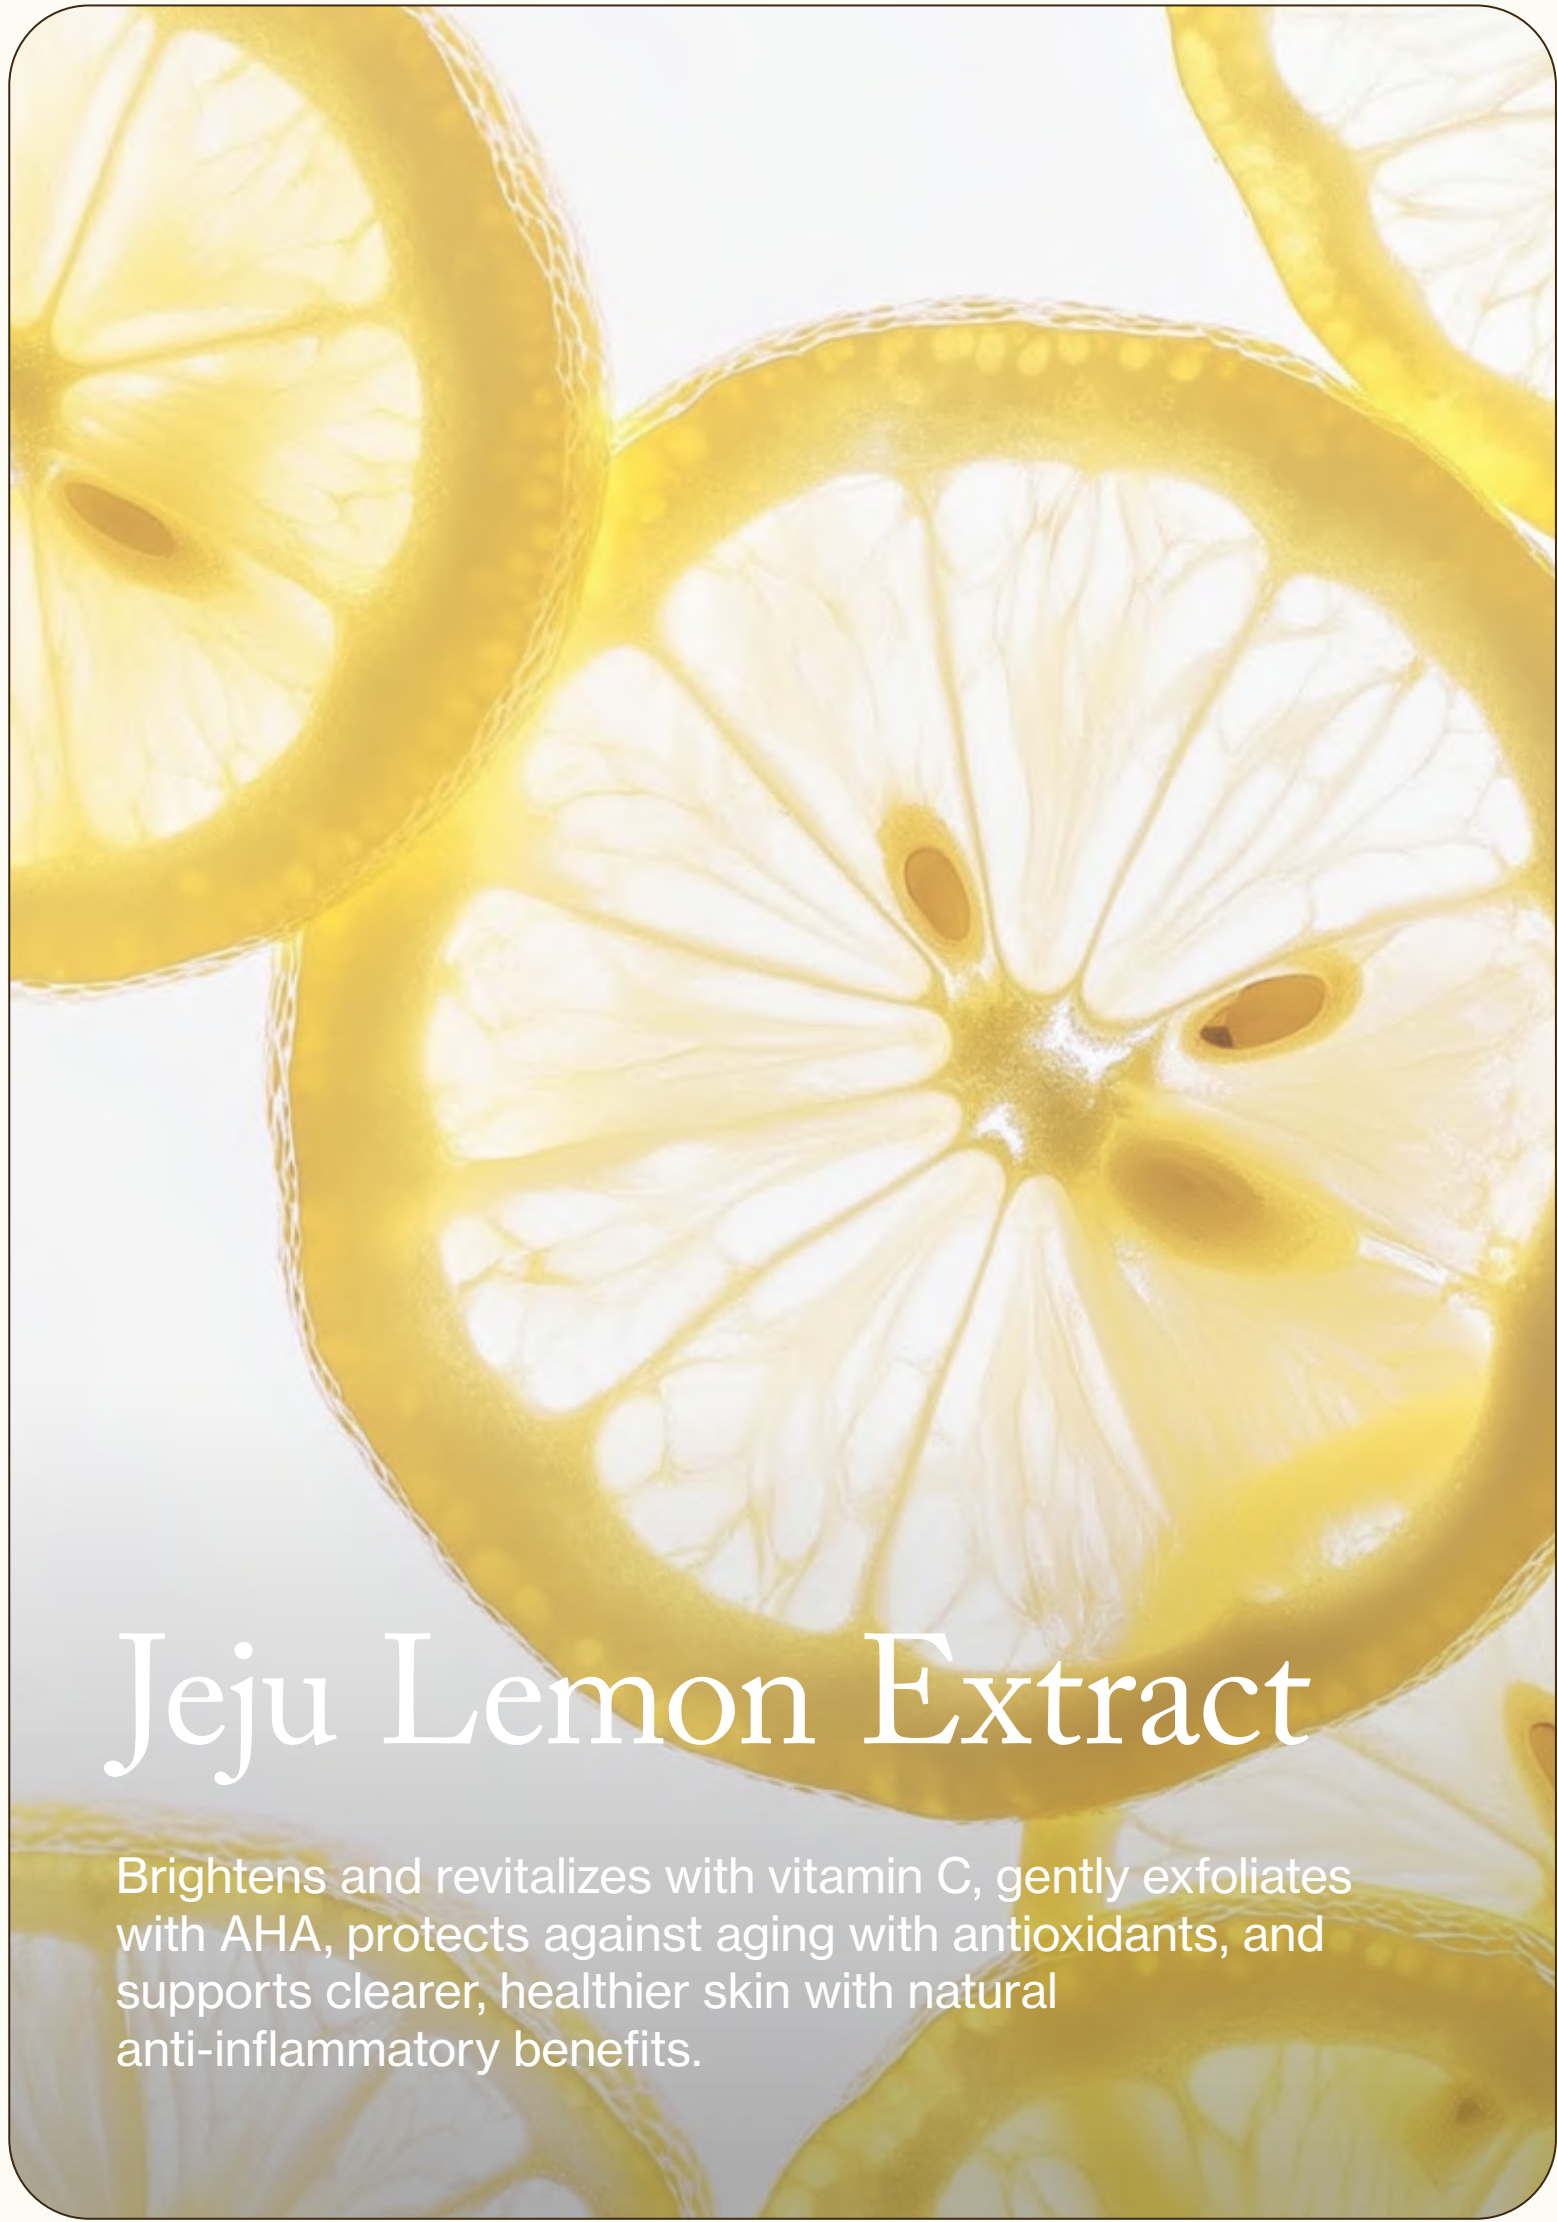

- Collagen (COL1A1): A key fibrous protein in skin, blood vessels, bones, and muscles—essential for strength and firmness.
- Fibrillin (FBN1): A vital component of elastic fibers, supporting skin elasticity and aiding elastin synthesis.

Proven Results:

Compared to the control group, COL1A1 expression increased by ~20% and FBN1 expression by ~60%, highlighting powerful regenerative and anti-aging potential.

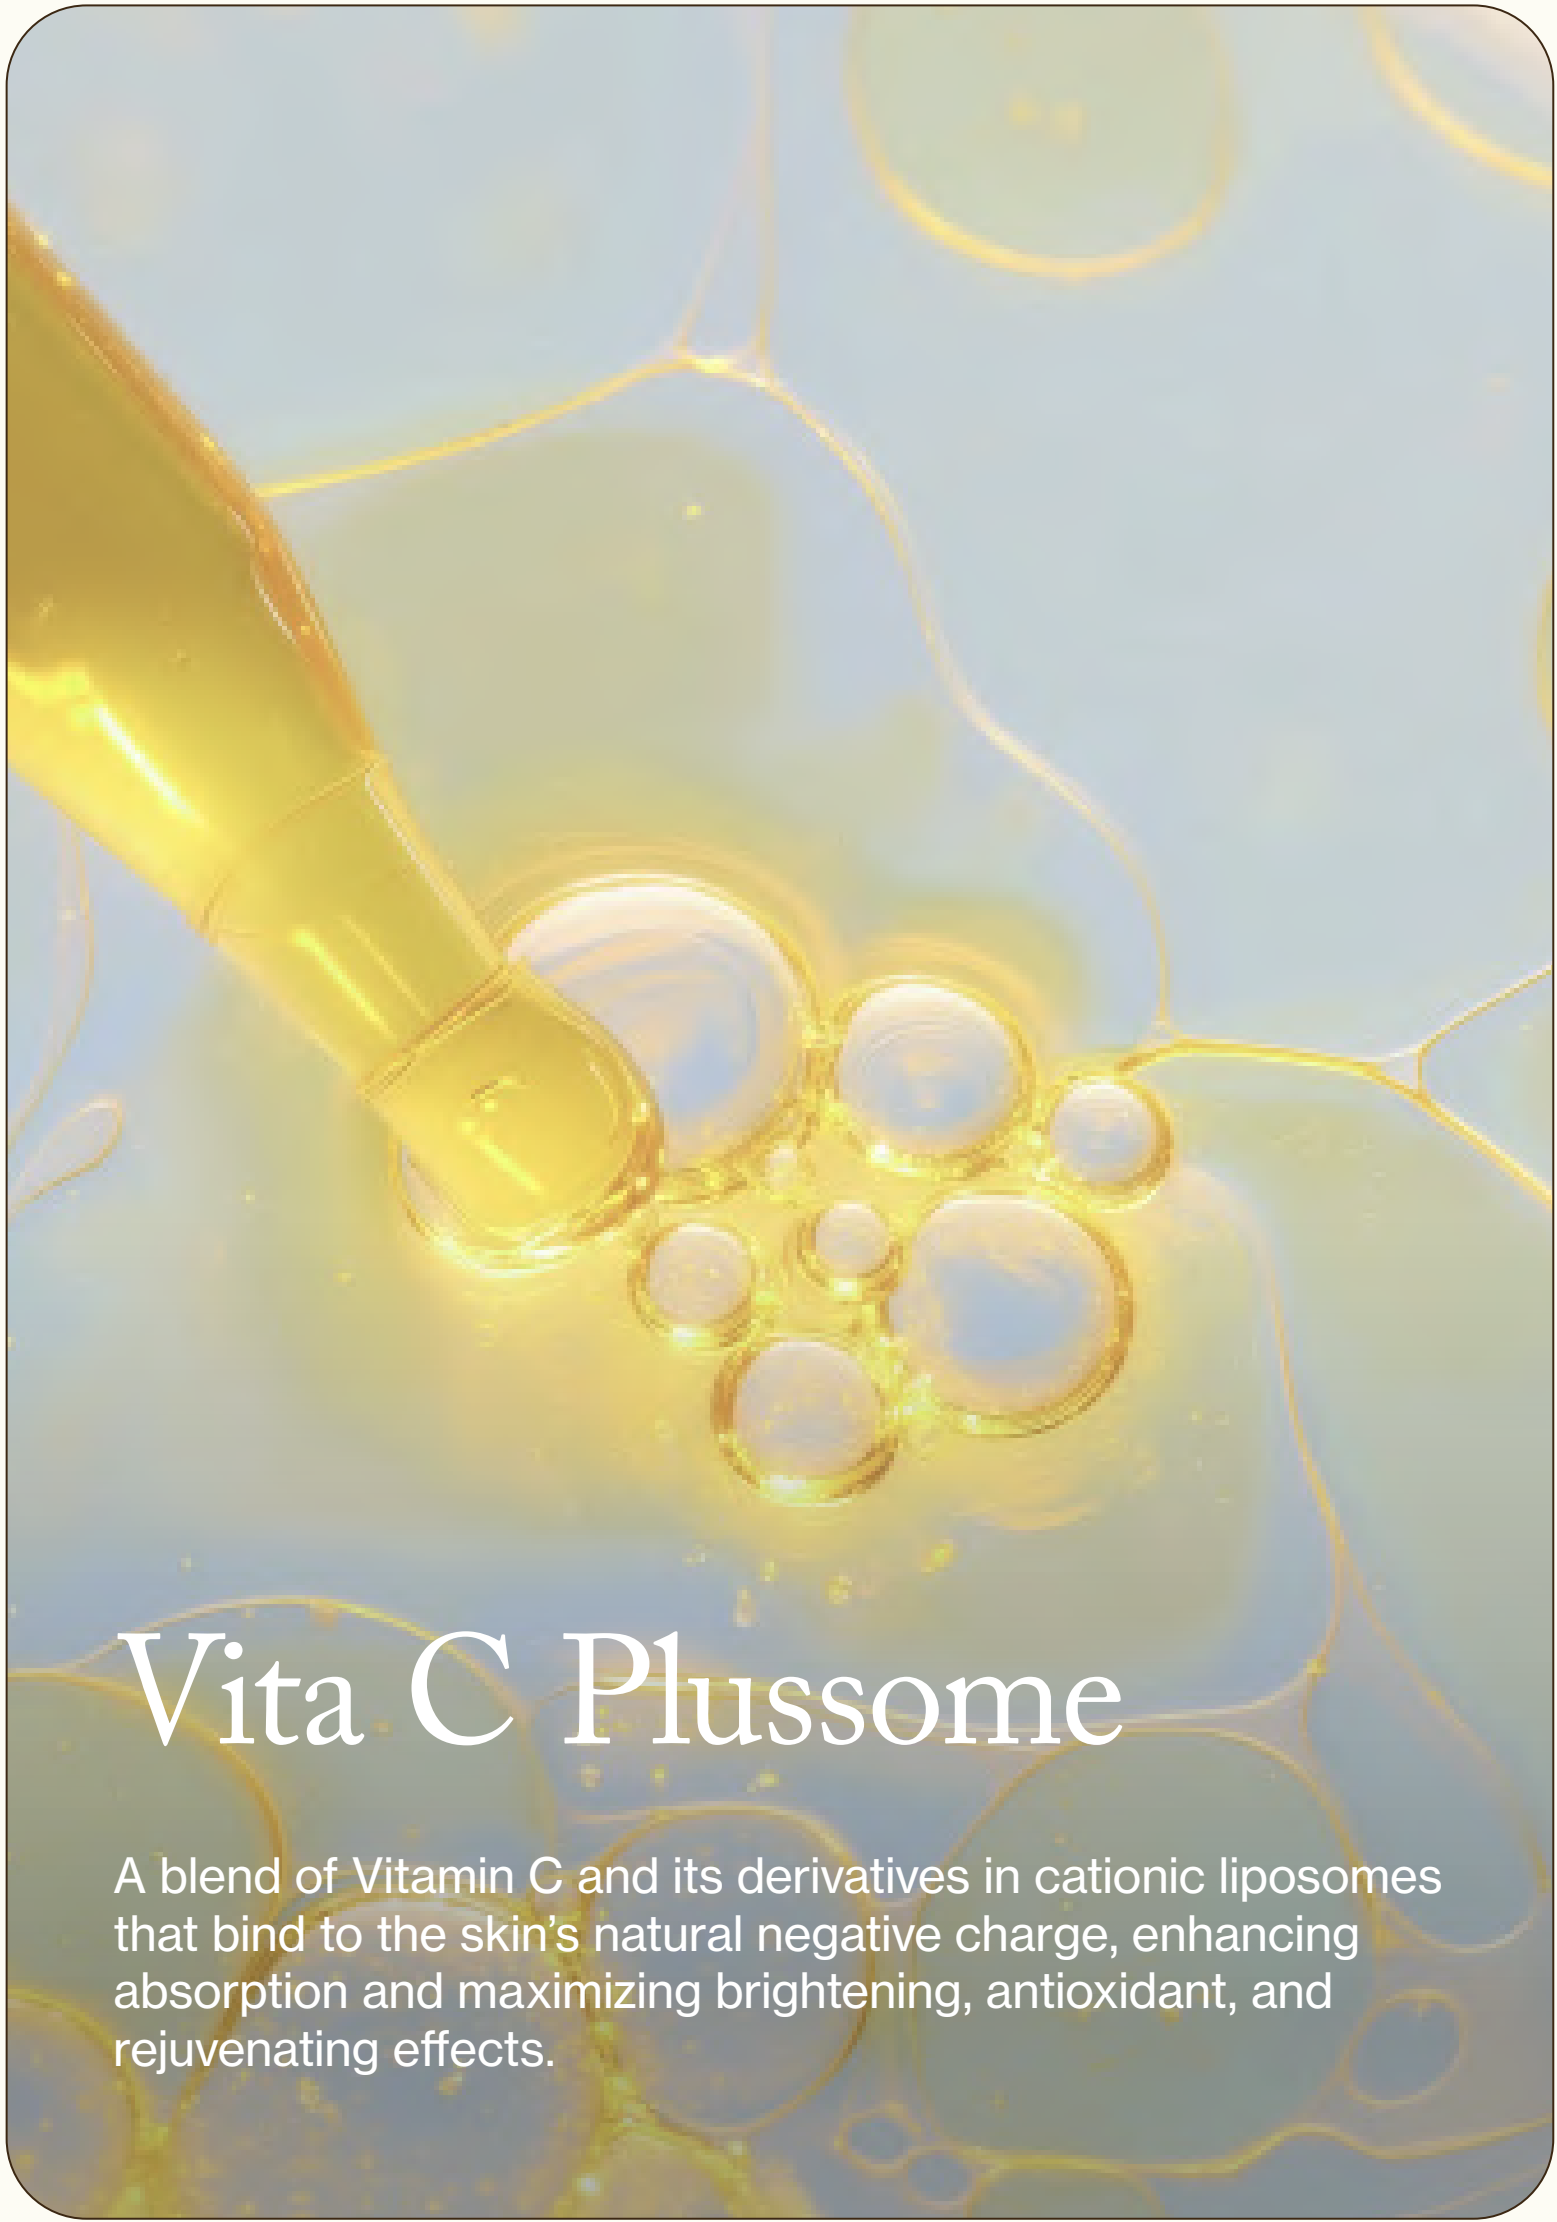

Clinically proven, lemon exosomes visibly improve wrinkles, UV pigmentation, hydration, sebum balance, and overall skin texture, restoring firmness, elasticity, and a healthy, radiant glow.

A close-up photograph of several thin slices of lemons, showing the internal pulp and seeds, arranged in a slightly overlapping manner. The lighting is bright, highlighting the texture of the lemon skin and the juicy interior.

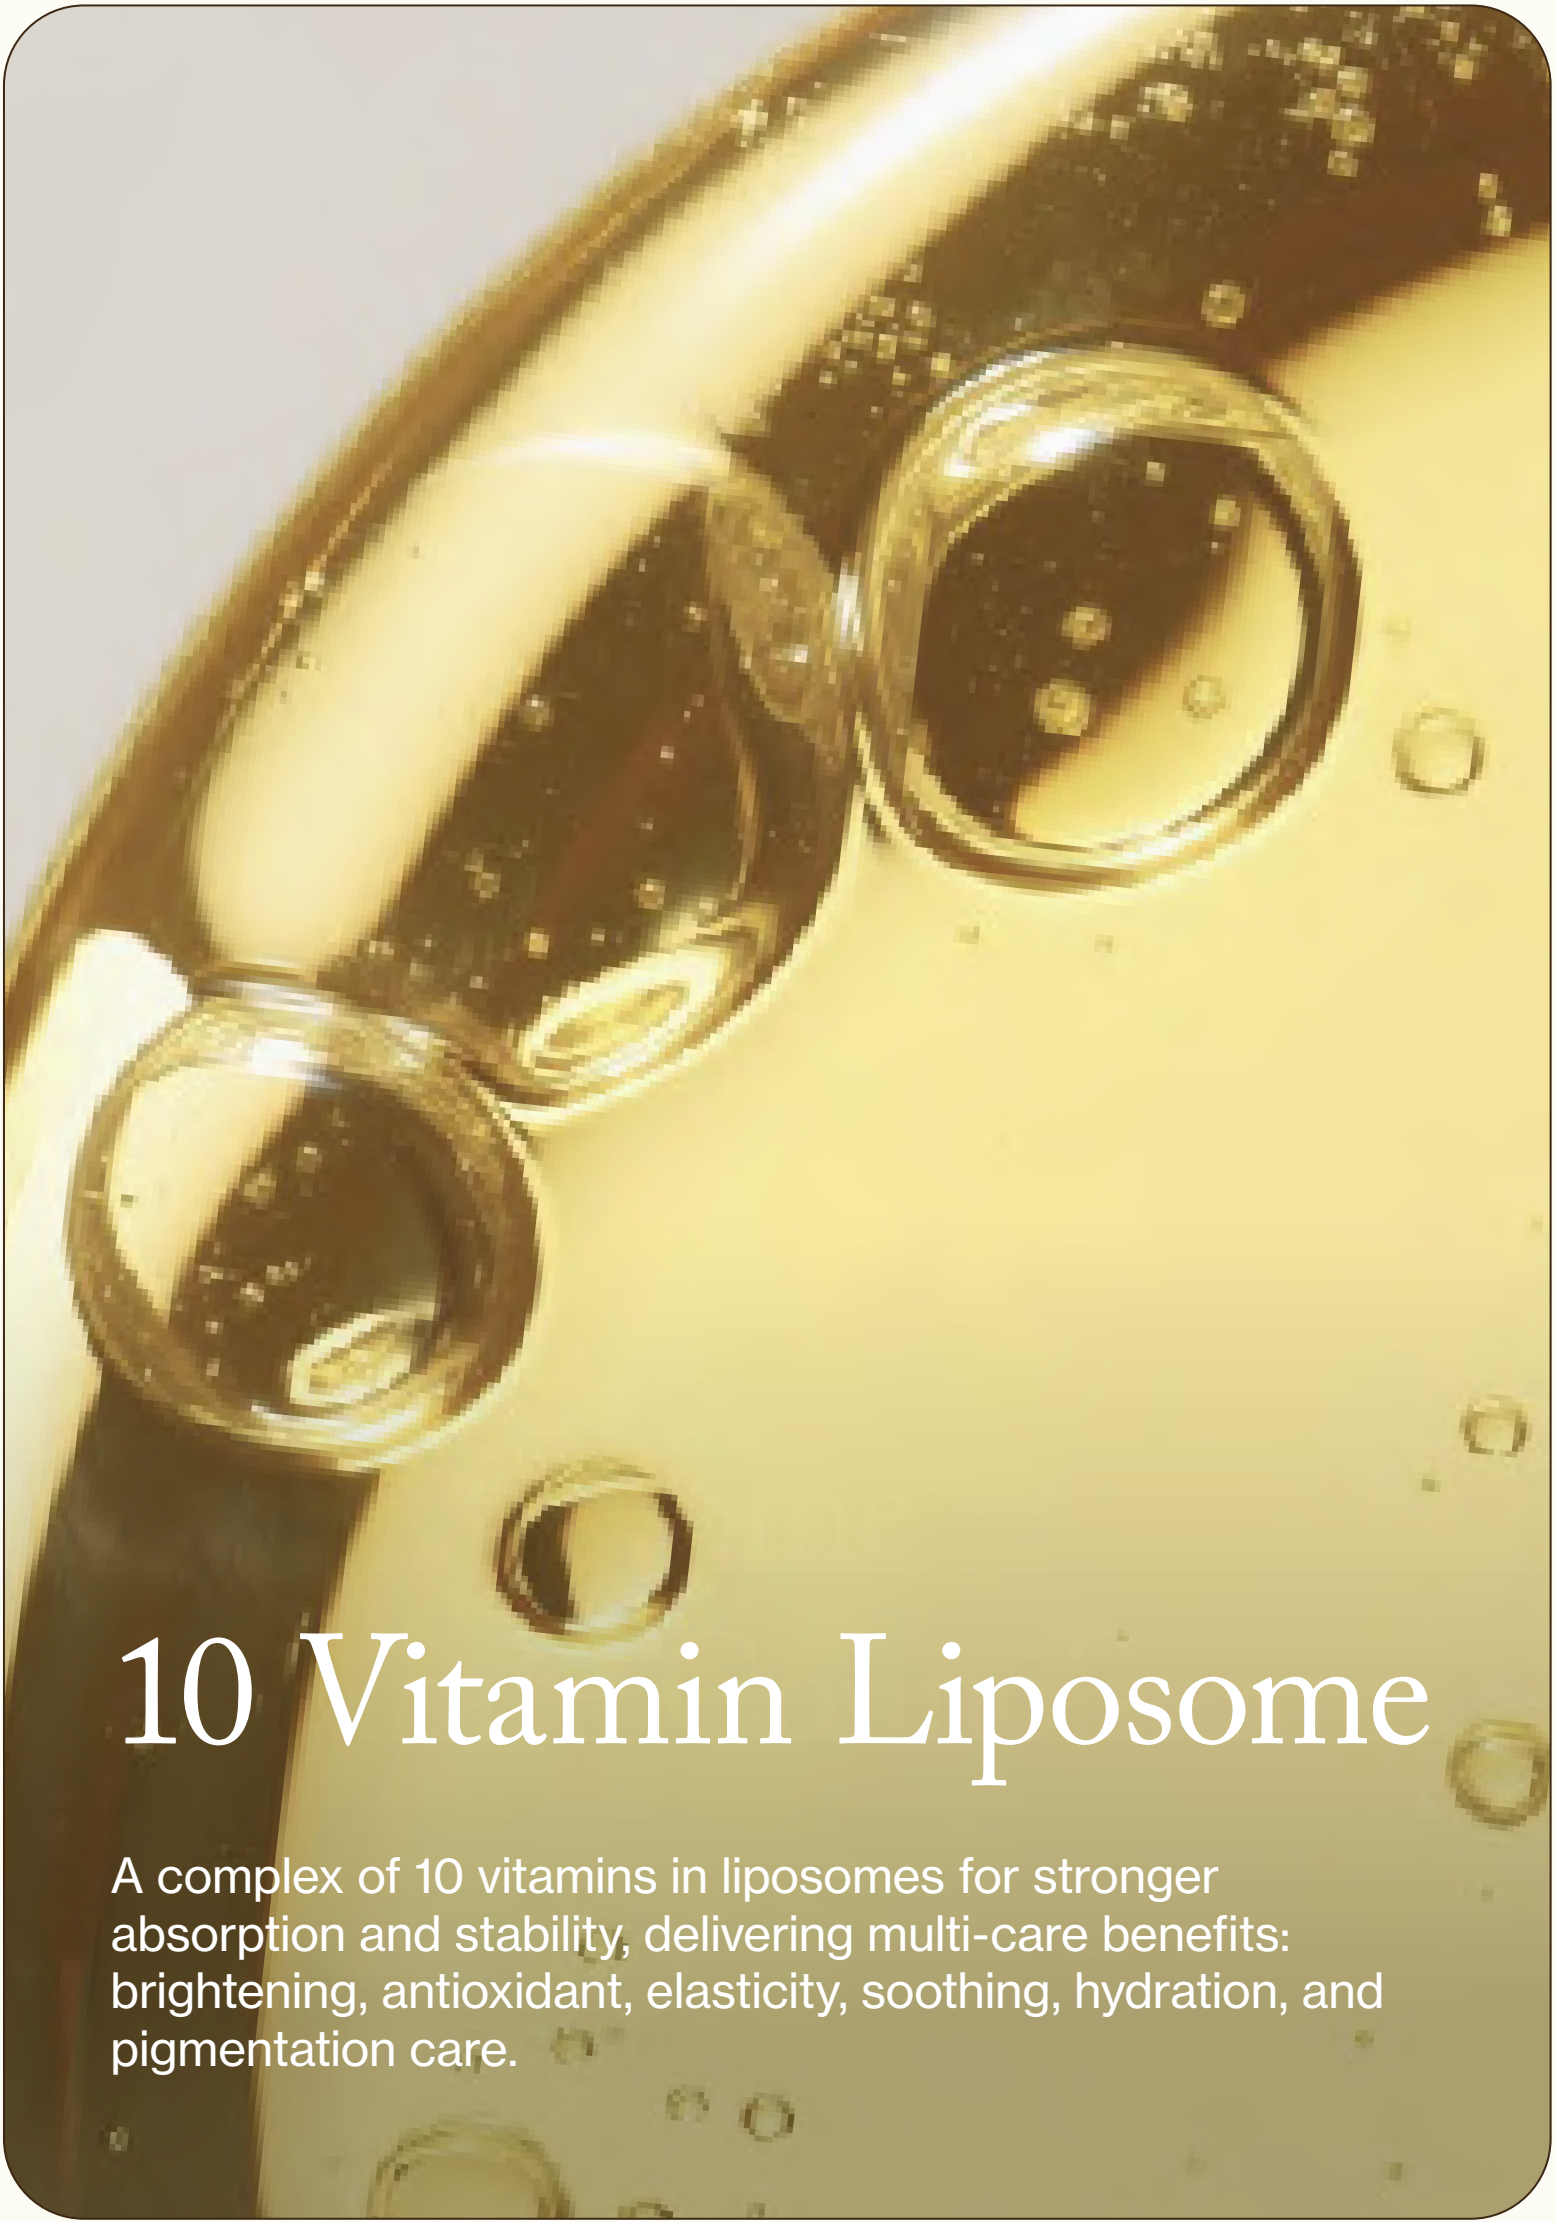

Jeju Lemon Extract

Brightens and revitalizes with vitamin C, gently exfoliates with AHA, protects against aging with antioxidants, and supports clearer, healthier skin with natural anti-inflammatory benefits.

A close-up photograph of a glass dropper with a yellow cap, dispensing a golden-yellow liquid into a pool of water. The liquid forms several small, shimmering bubbles on the water's surface. The background is a soft, out-of-focus blue.

Vita C Plussome

A blend of Vitamin C and its derivatives in cationic liposomes that bind to the skin's natural negative charge, enhancing absorption and maximizing brightening, antioxidant, and rejuvenating effects.

A close-up photograph of a glass dropper with a yellow cap, dispensing a golden-yellow liquid into a pool of water. The liquid forms several large, shimmering bubbles on the water's surface. The background is a soft, out-of-focus blue.

10 Vitamin Liposome

A complex of 10 vitamins in liposomes for stronger absorption and stability, delivering multi-care benefits: brightening, antioxidant, elasticity, soothing, hydration, and pigmentation care.

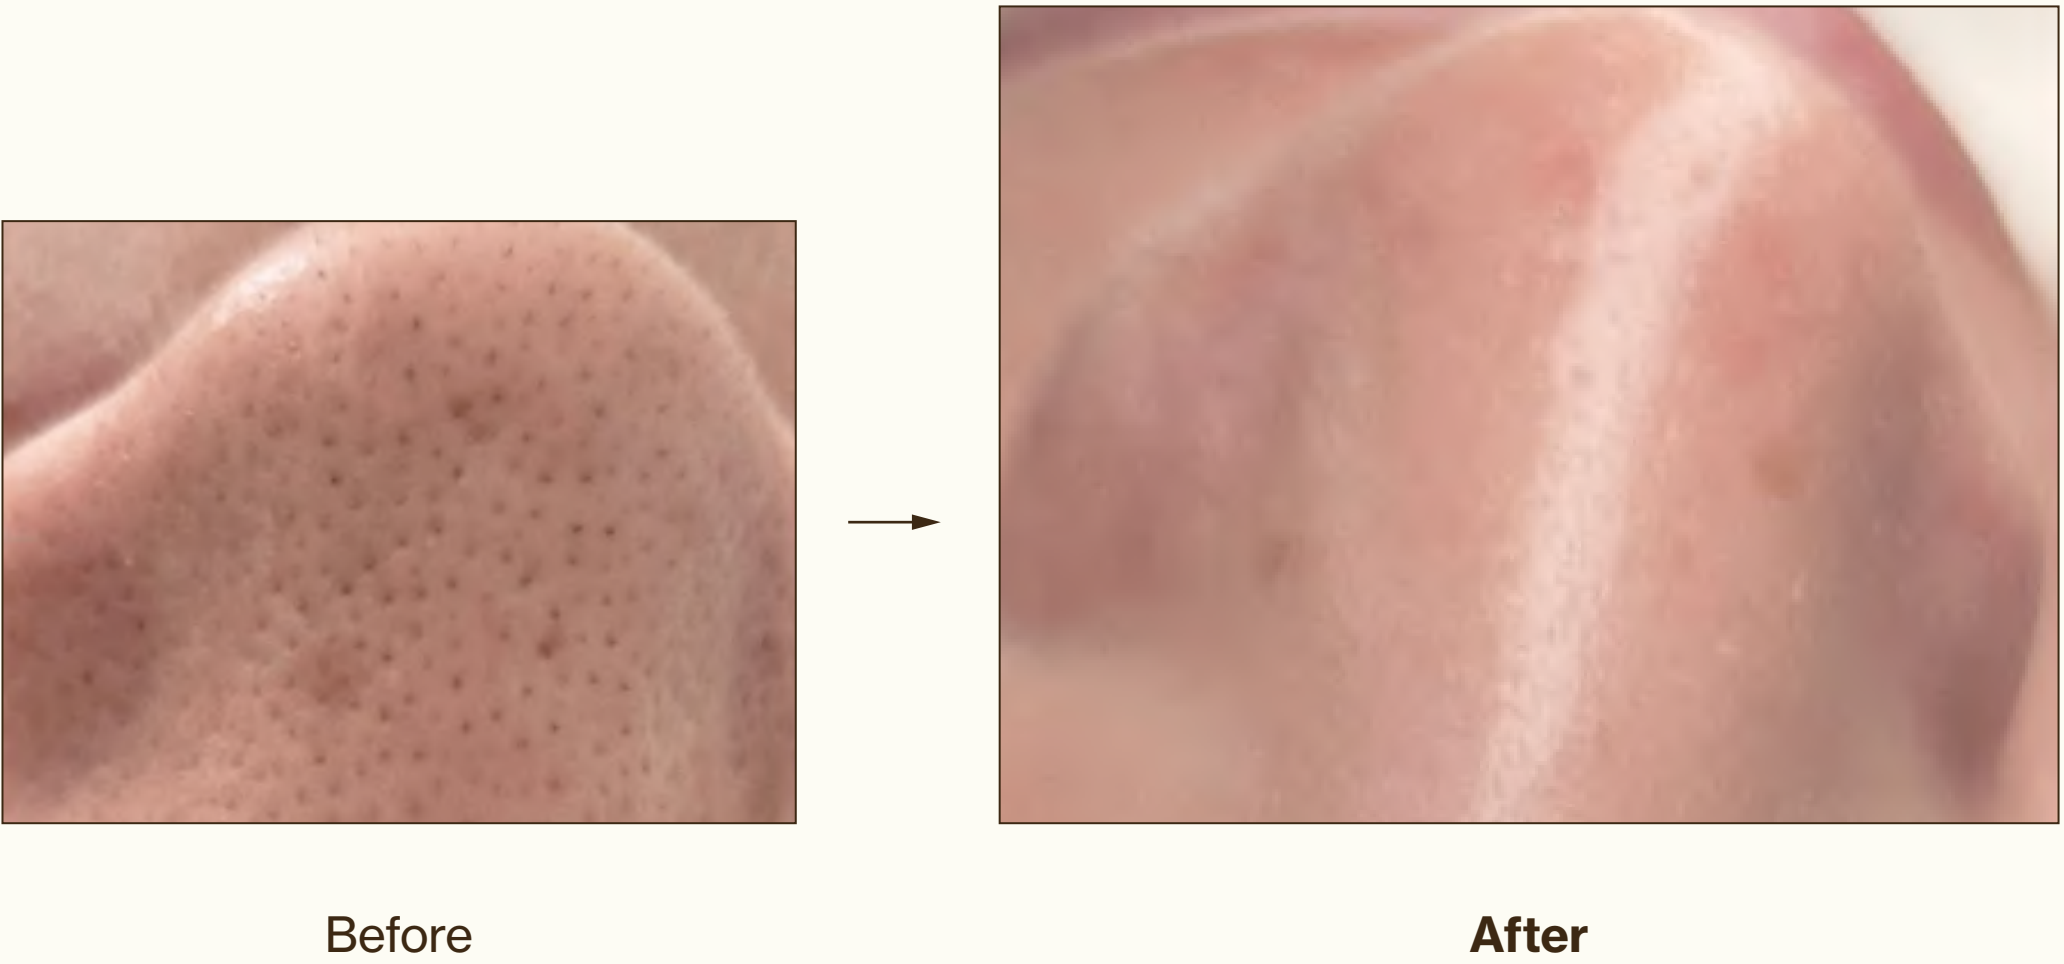

Lemonshot 150

Exo: Booster Serum

PROVEN TO
Anti-Aging · Brightening · Pore Tightening

Images captured after 10 days of use
– brightening & pore-refining effect

- 21.4% – Radiance & Dark spot Improvement
- 13.7% – Firmness Improvement
- 31.8% – Pore Appearance Reduction
- 12.6% – Texture Smoothing

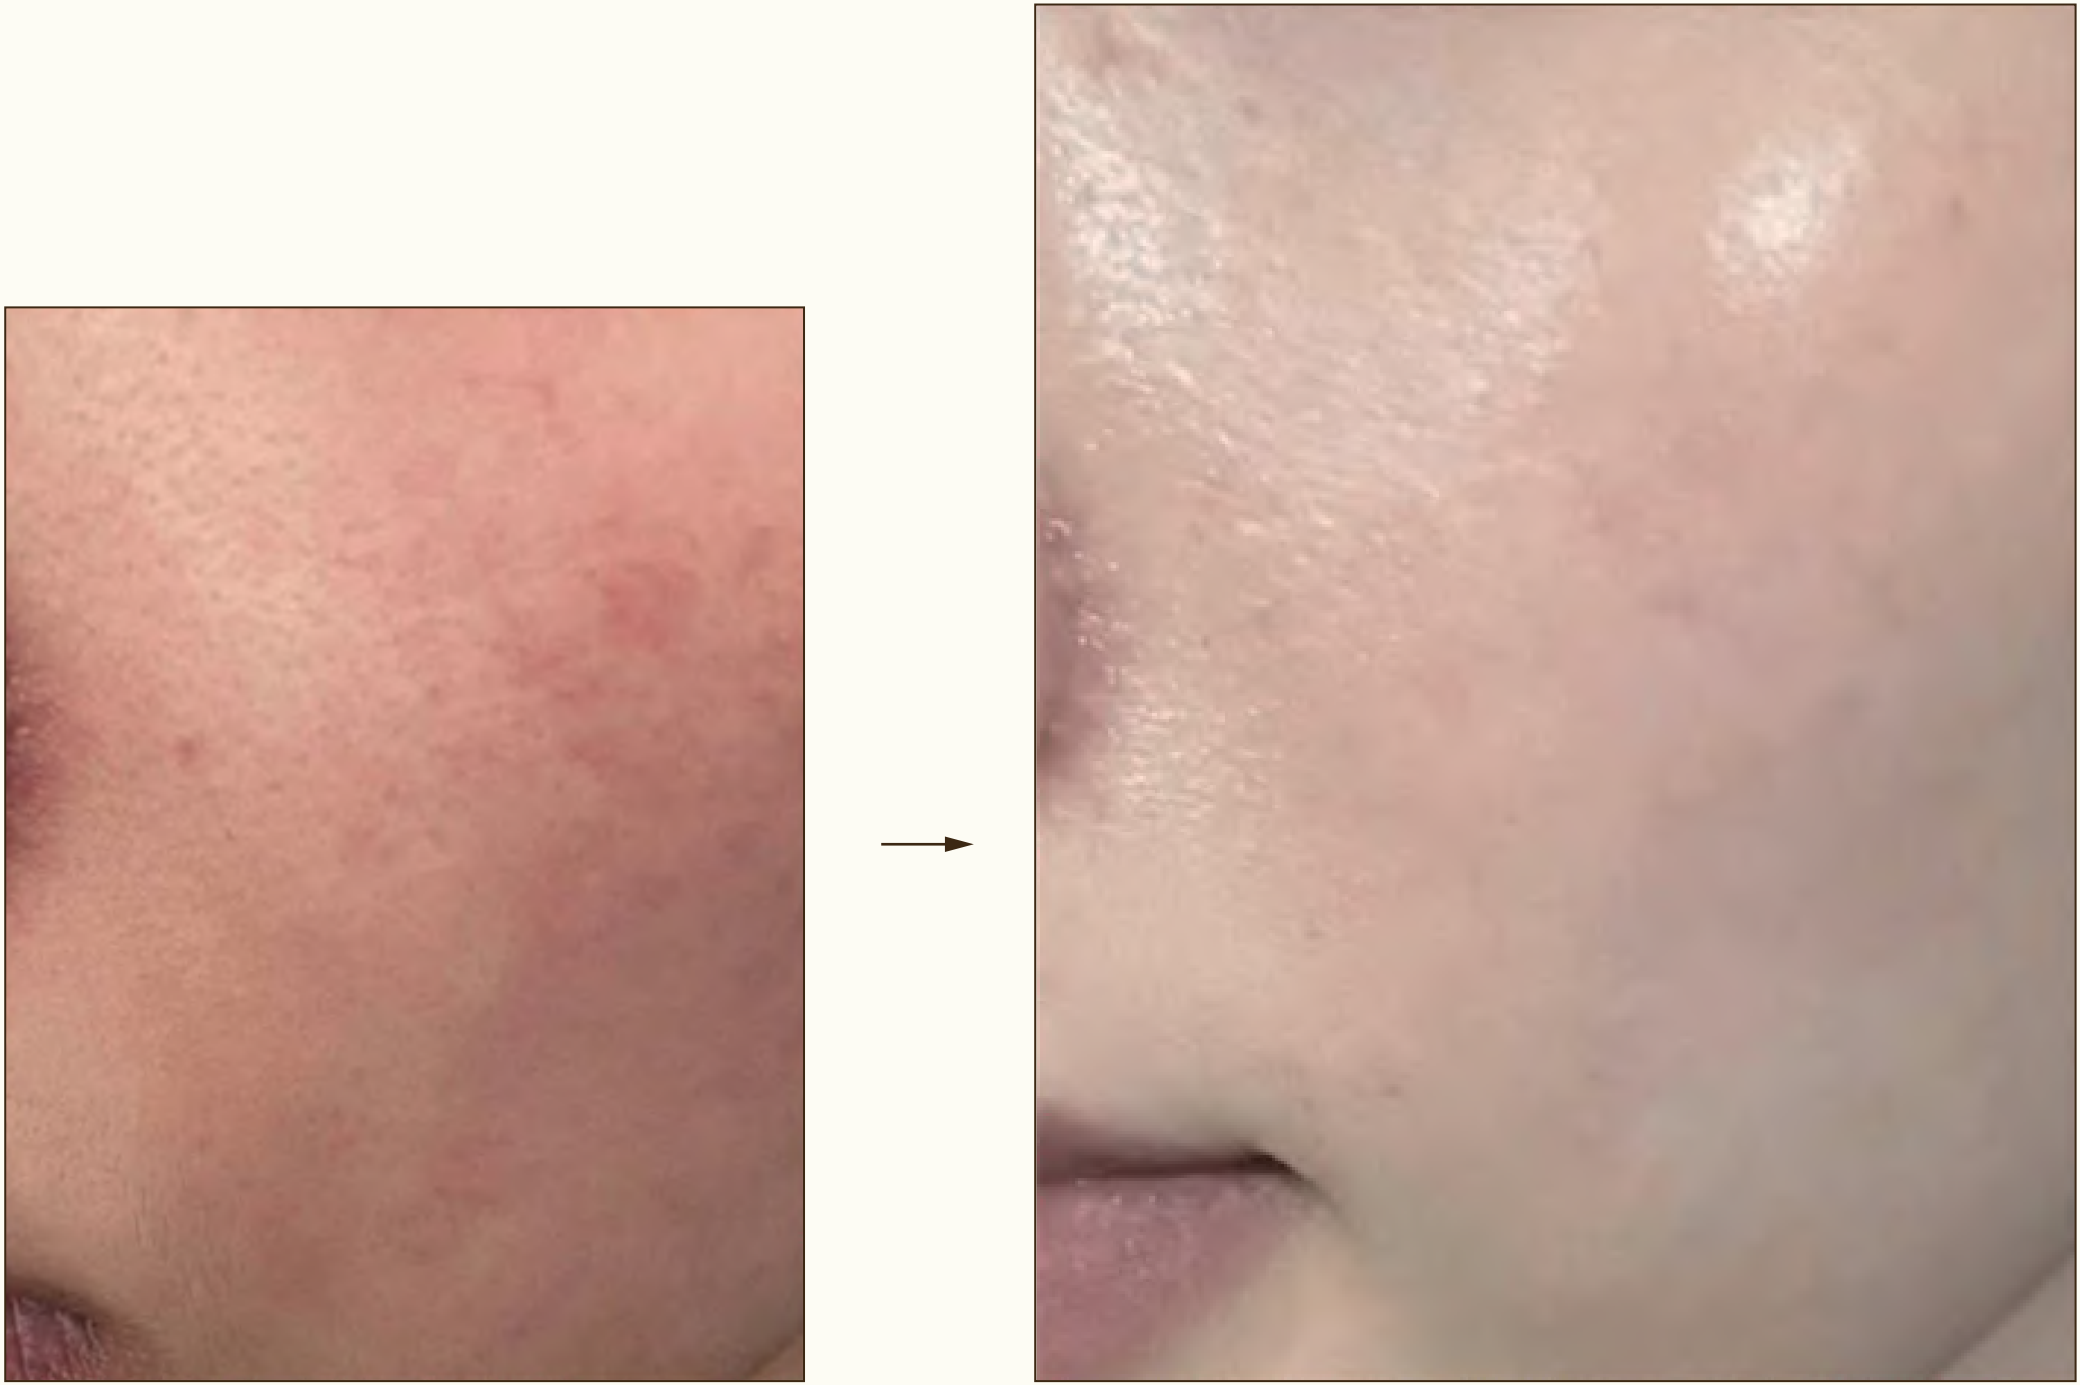

Lemonshot Exo: Booster Cream

Purimax™ Technology

At the heart of Lemonderma lies Purimax™, advanced purification technology developed through decades of expertise in exosome science.

Purimax™ is designed to:

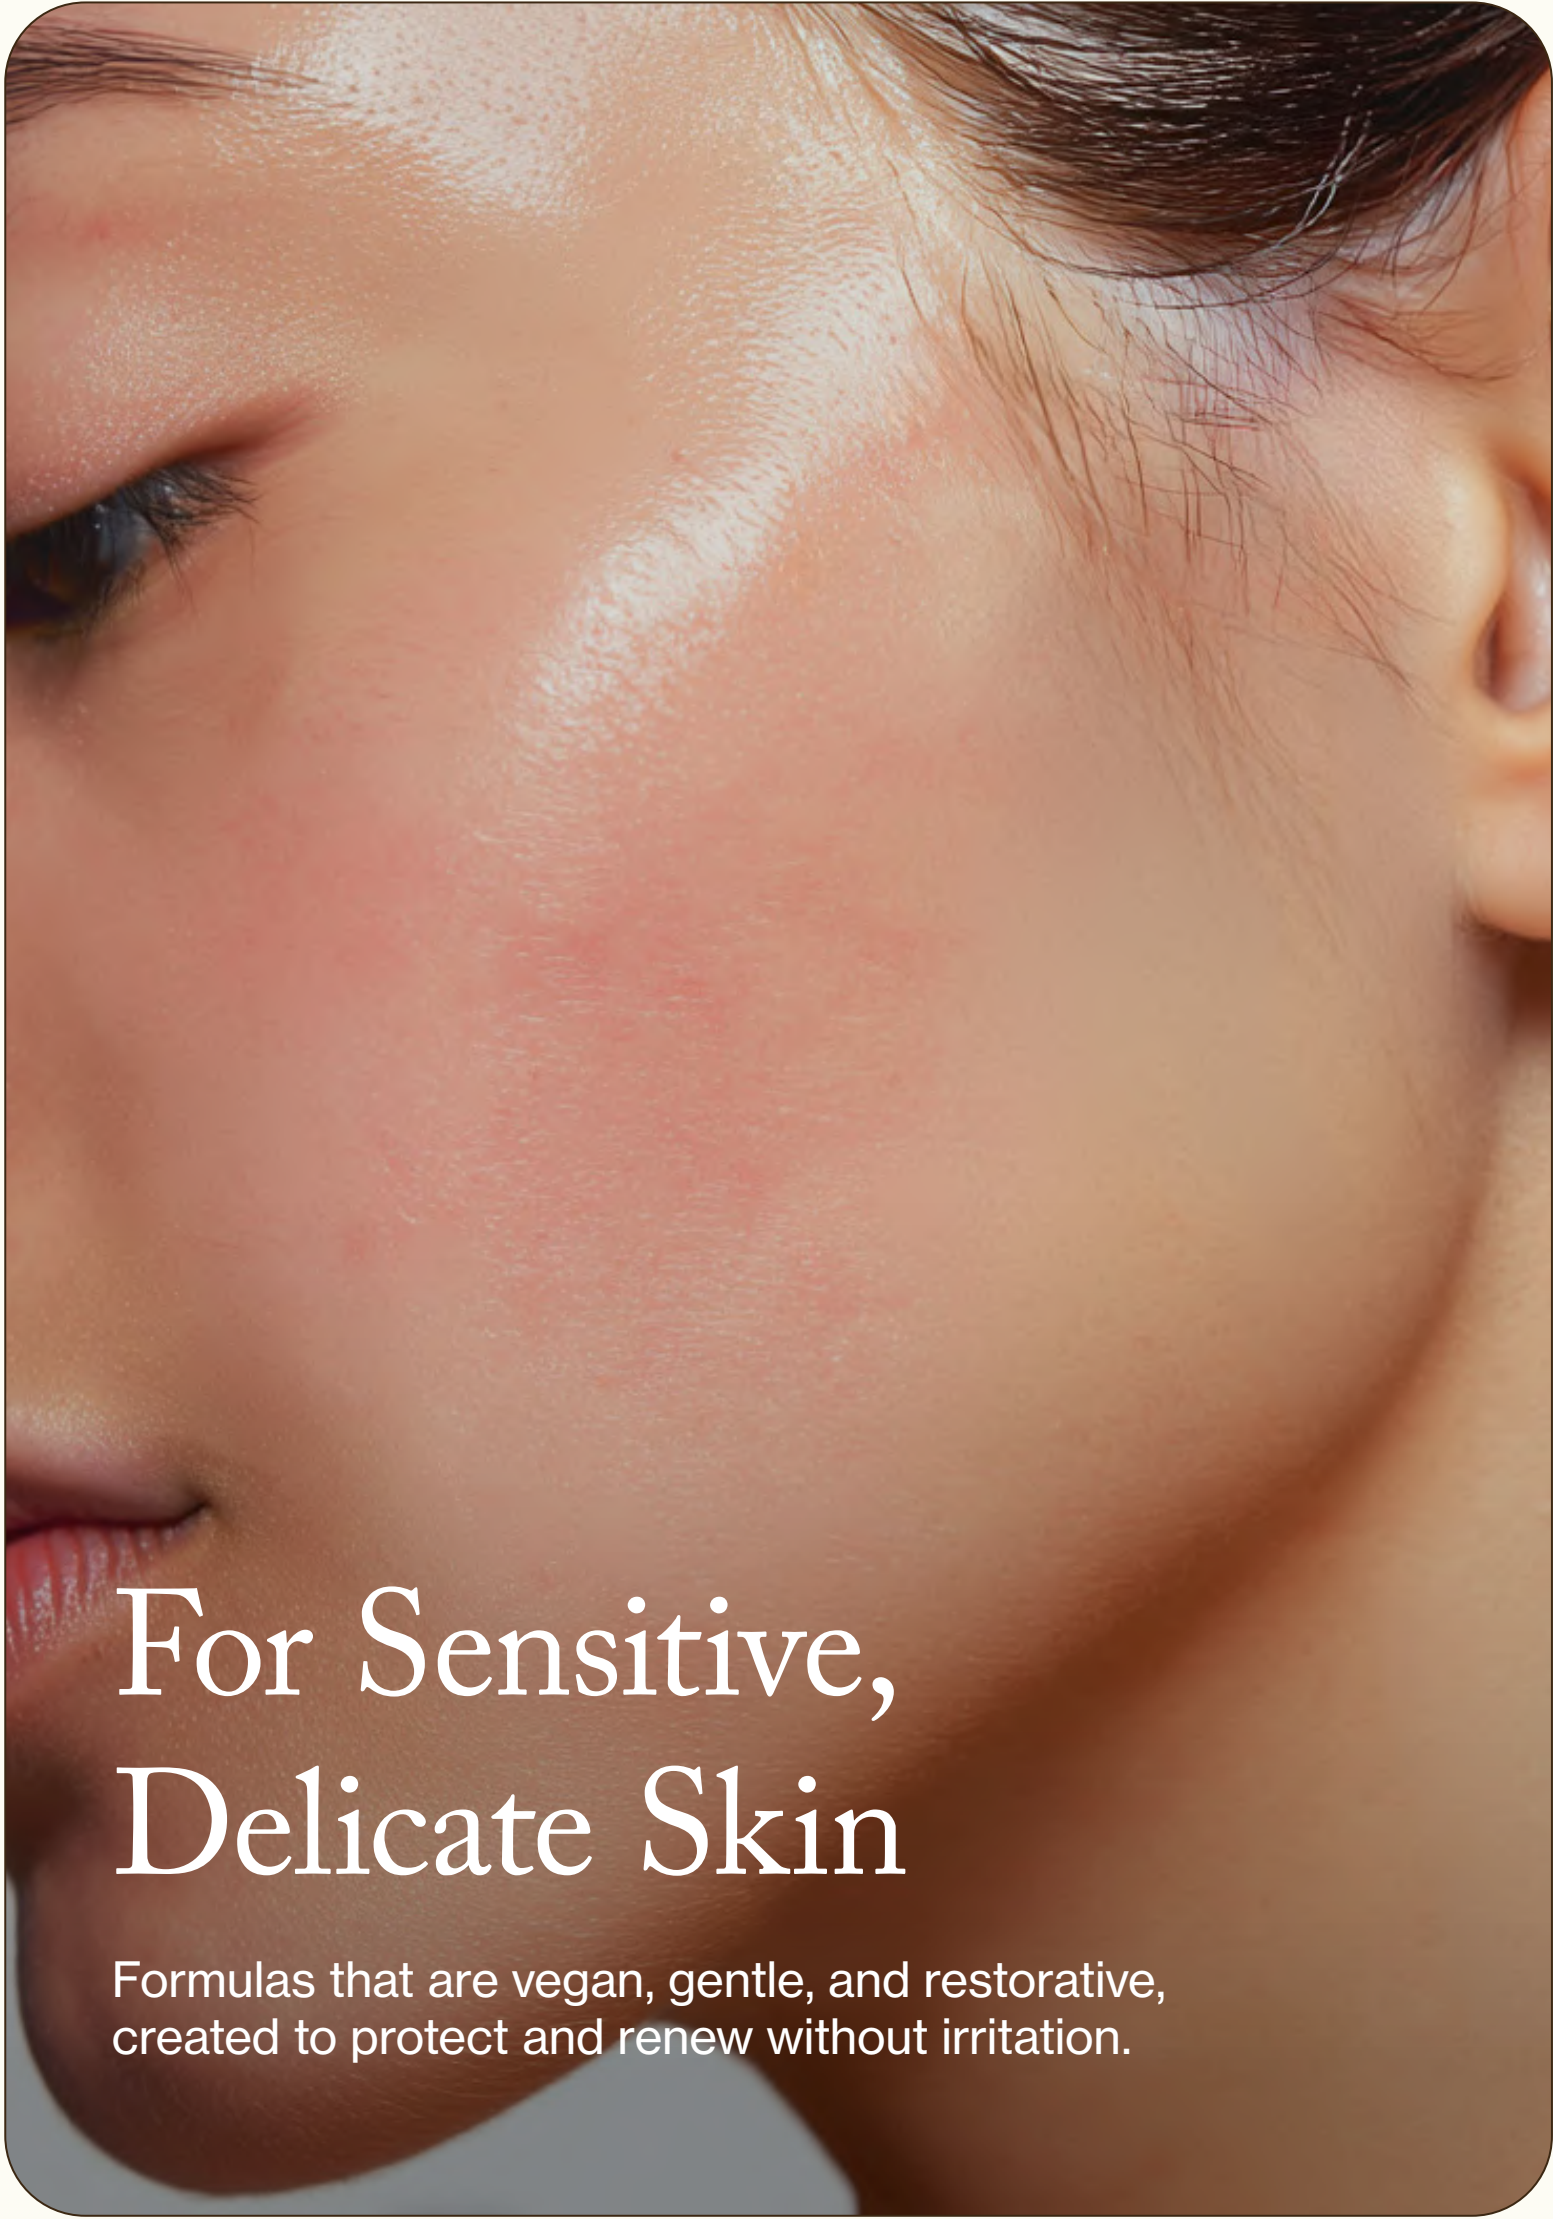

- Isolate & refine exosomes at the highest level of purity and stability
- Preserve active bio-molecules for optimal efficacy
- Ensure safety and consistency through pharmaceutical-grade quality control

This cutting-edge process allows Lemonderma to deliver vegan-friendly, clinically inspired formulas that are gentle enough for sensitive skin yet powerful enough to create visible, lasting results.

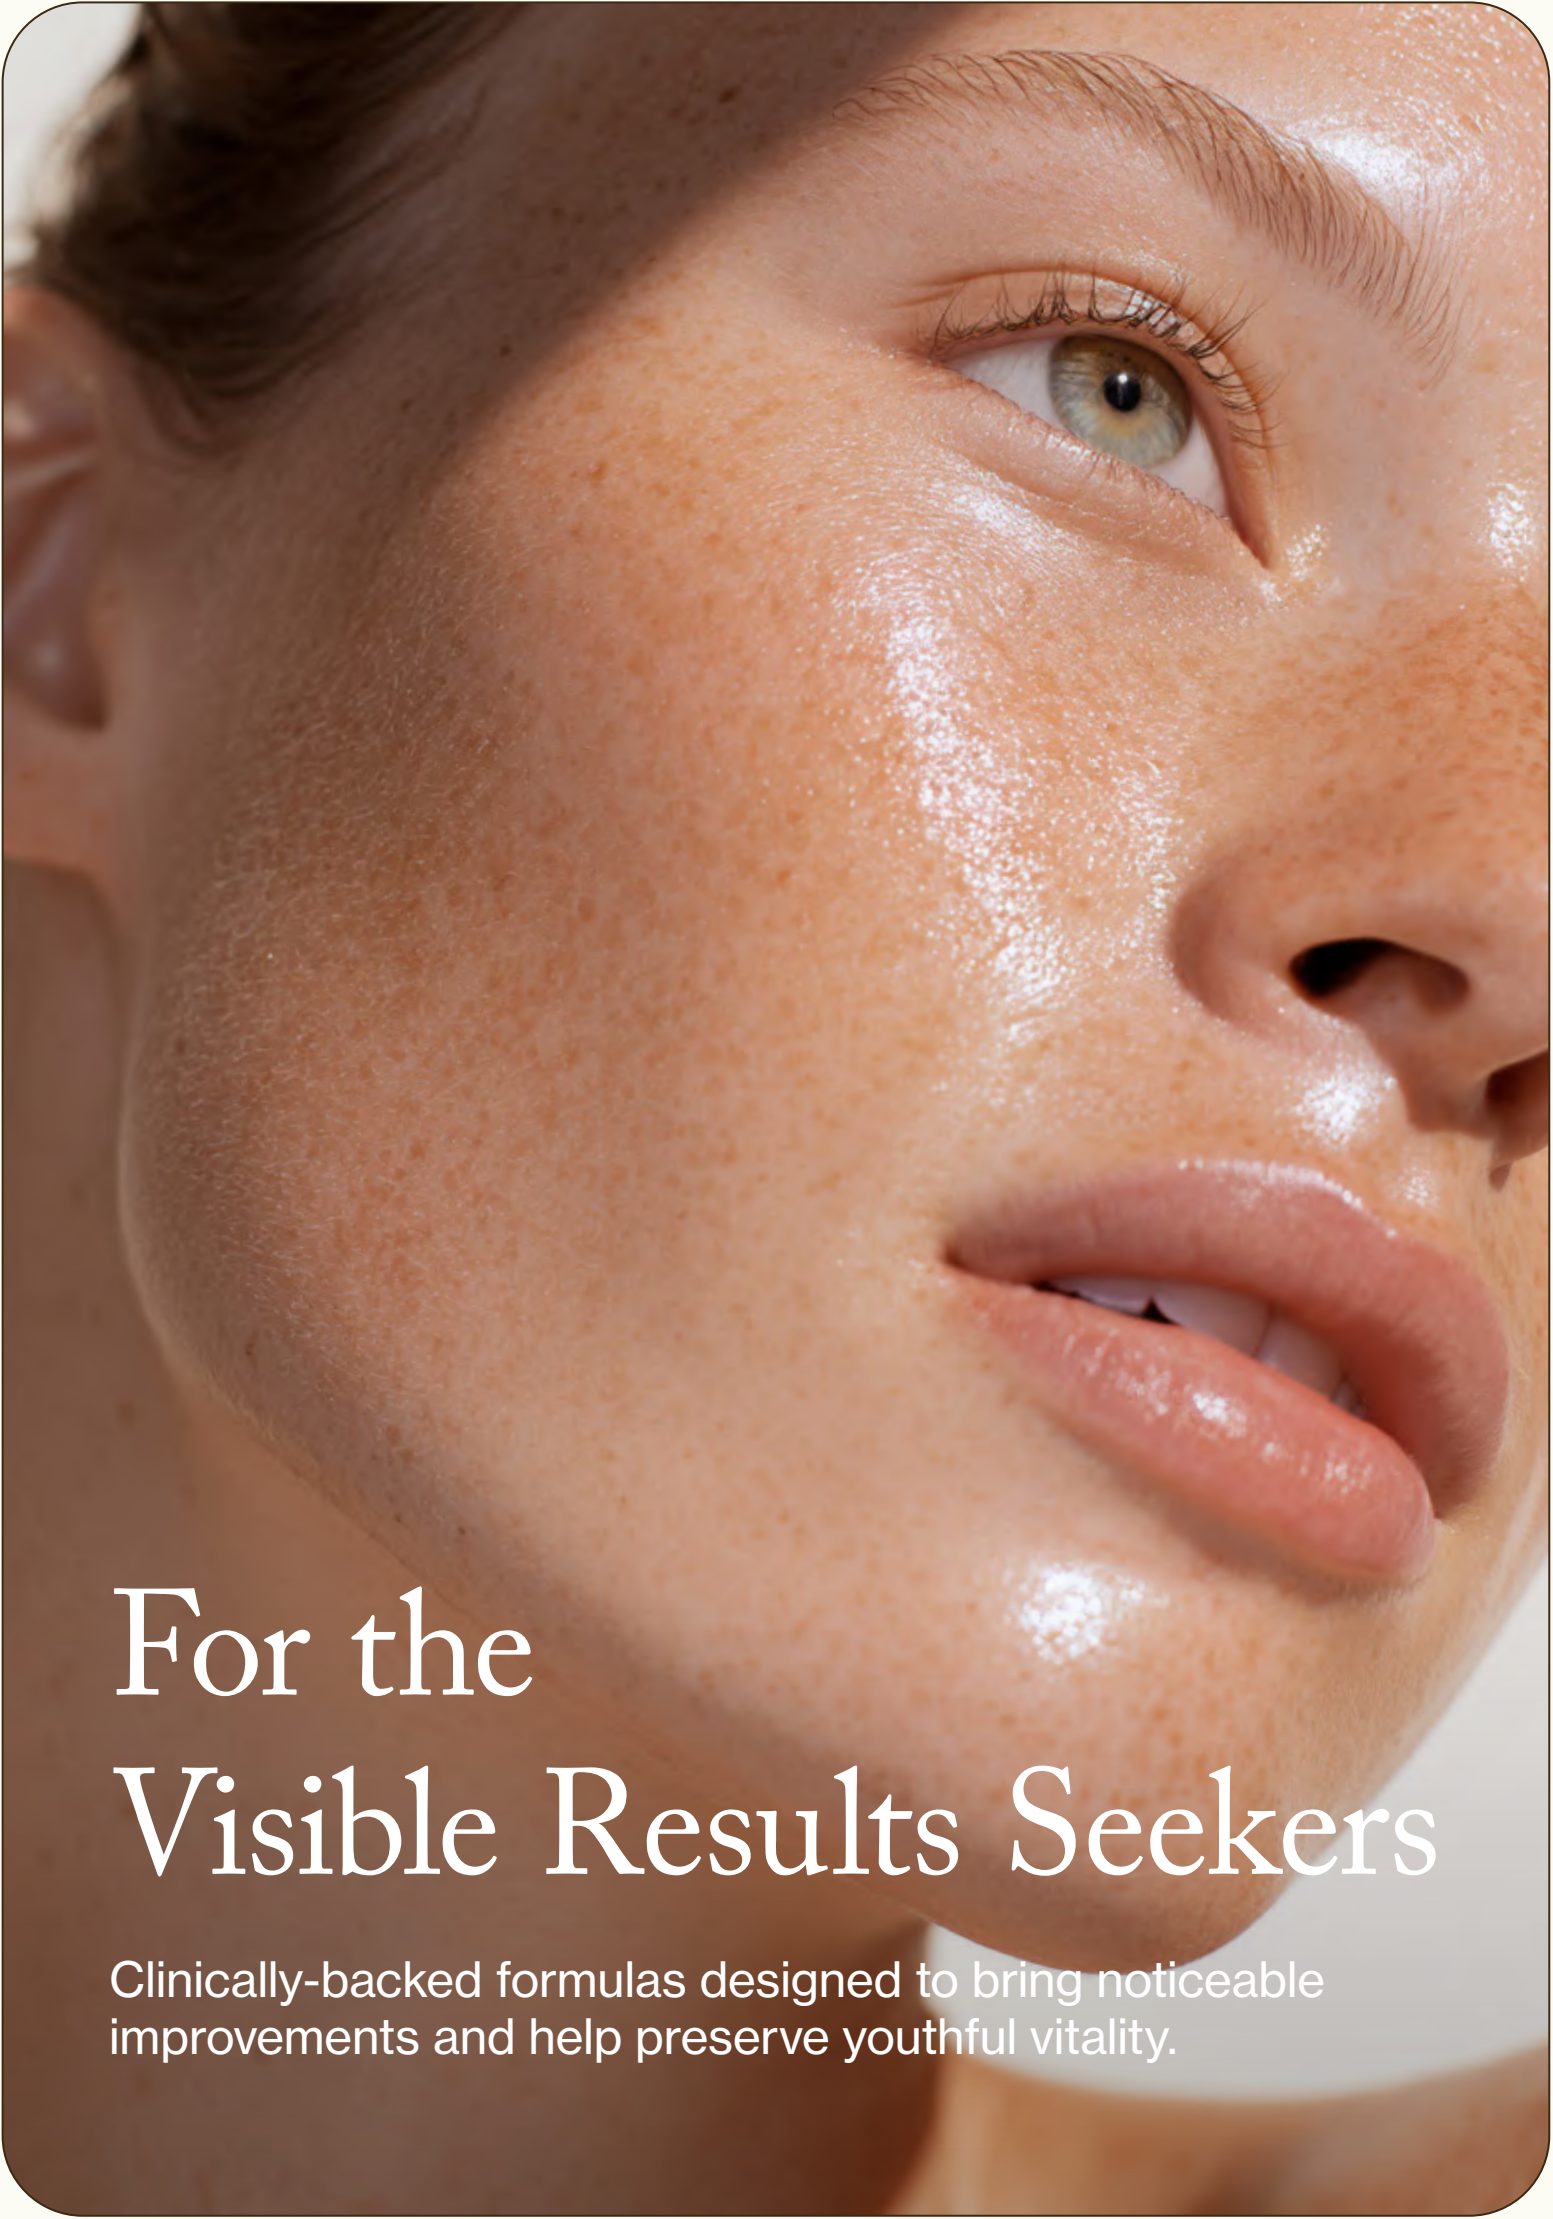

Proven by Science
Clinical Scientific Credibility

A close-up photograph of a woman's face, focusing on her cheek and forehead. Her skin appears slightly red and irritated, with some visible redness and small bumps, suggesting sensitivity or delicate skin.

For Sensitive,
Delicate Skin

Formulas that are vegan, gentle, and restorative, created to protect and renew without irritation.

A close-up photograph of a woman's face, focusing on her cheek and forehead. Her skin is clear, smooth, and has a natural glow, indicating visible improvements in skin health.

For the
Visible Results Seekers

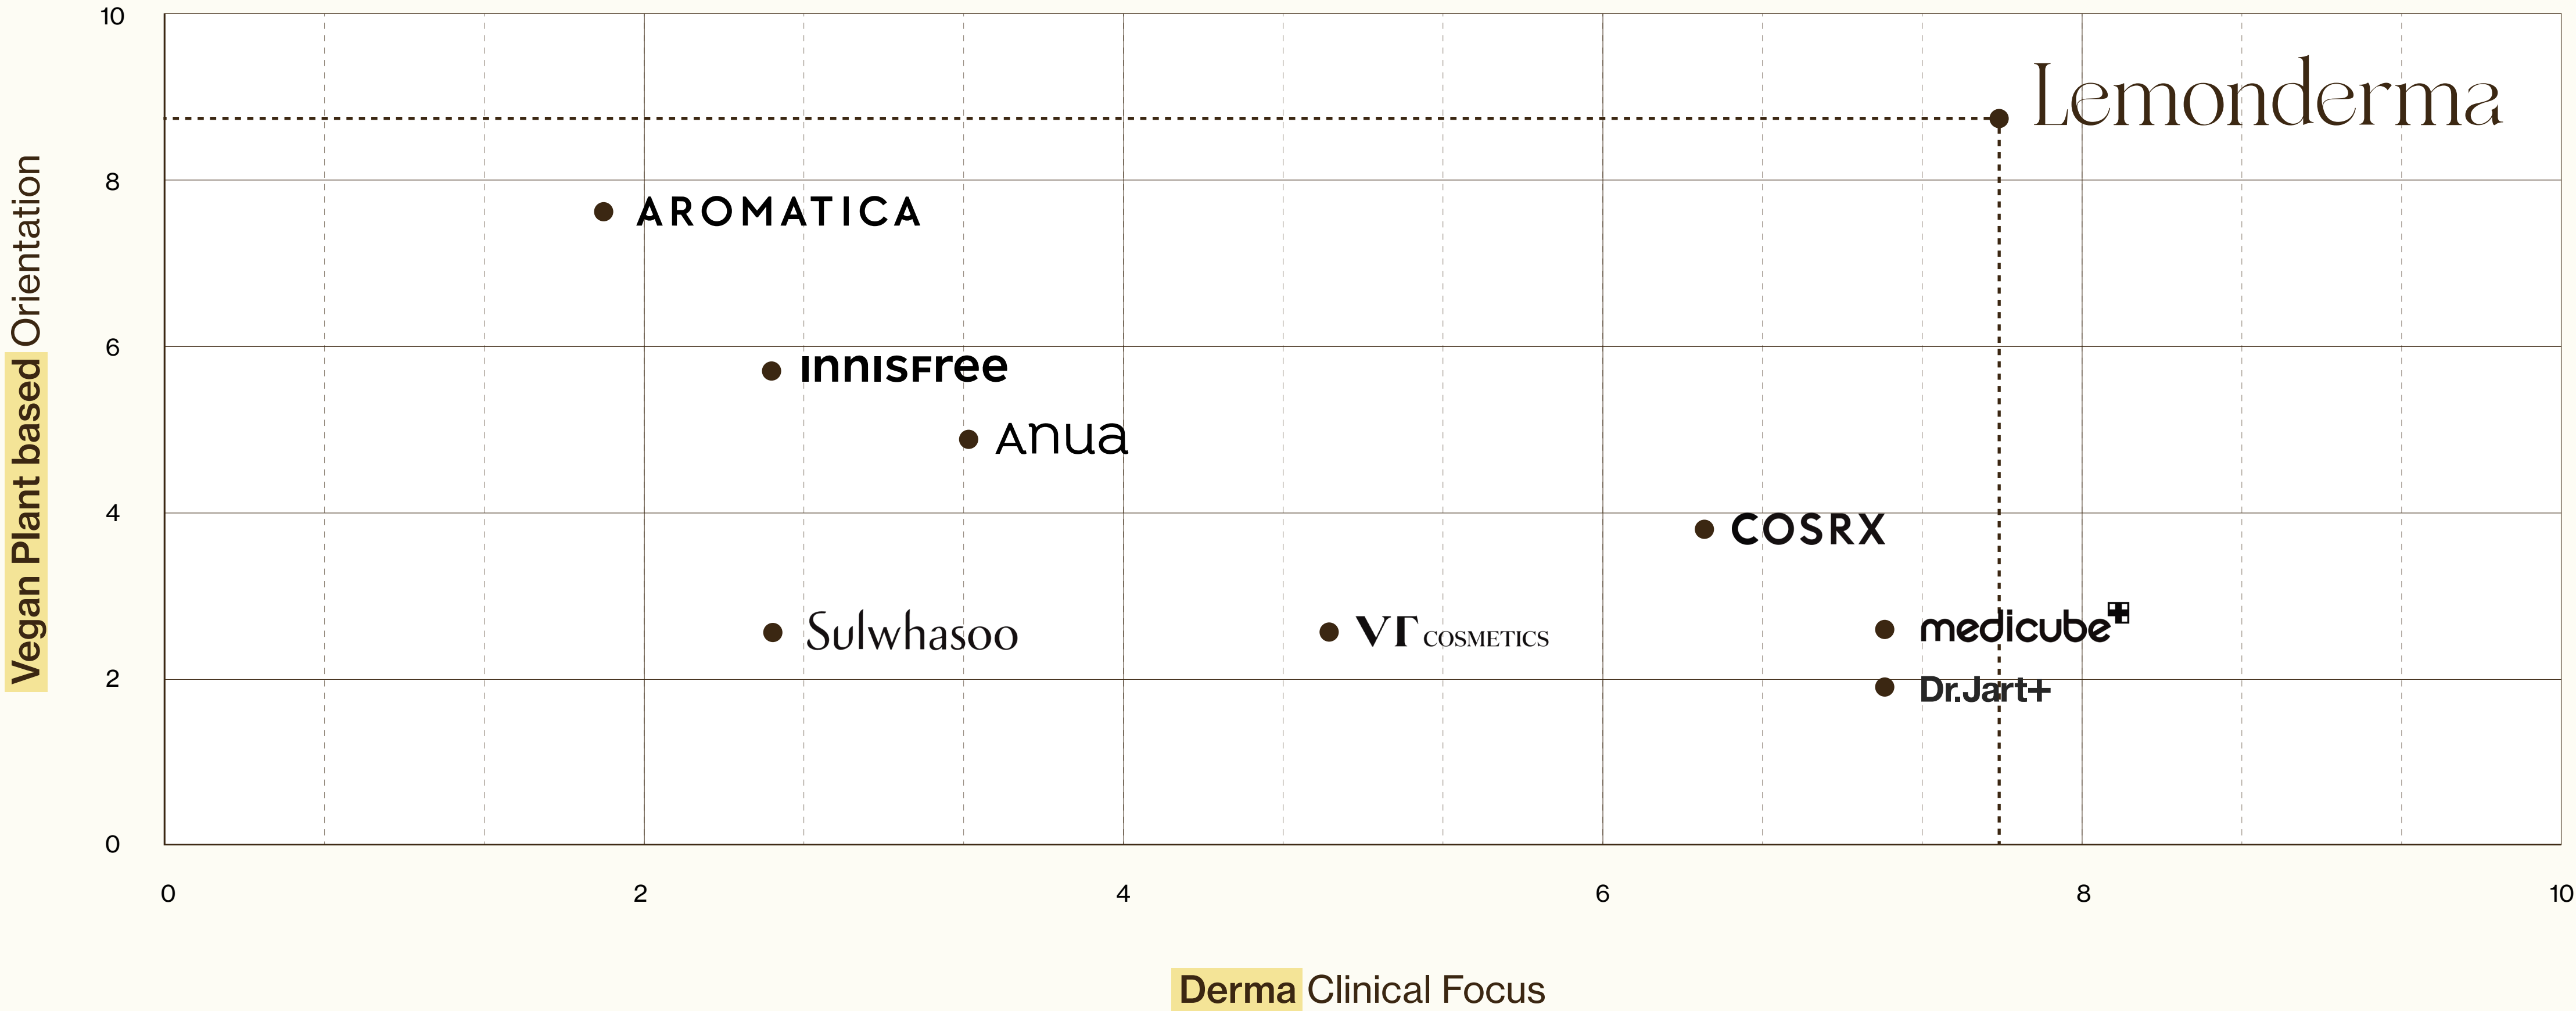

Clinically-backed formulas designed to bring noticeable improvements and help preserve youthful vitality.

A photograph of a woman with blonde hair in a bathroom, looking at her reflection in a mirror. She is holding a small bottle of Lemonderma product, and a towel is draped over the edge of the sink. The scene is softly lit, creating a calm and intimate atmosphere.

For At-Home
Skincare Connoisseurs

A seamless way to experience clinic-inspired care at home - effortless, comfortable, and woven into your daily ritual.

Global Presence

The Only One-Stop System
From cultivation to purification—all processes are driven by our in-house harvesting laboratory and clinic within the facility.

40% R&D Commitment
With over 40% of the annual budget dedicated to research, we continuously invest in innovation to lead the future of exosome science.

42+ Global Partnerships
Trusted by leading partners in more than 42 countries, creating an exclusive global network of excellence.

5 Clinical Publications (2024)
Backed by scientific credibility with five peer-reviewed clinical studies published in 2024.

17M+ Annual Capacity
A robust yearly production capacity of 17.6 million vials, ensuring reliability and scalability.

PCPC INCI Registered - Purimasomes™
Our proprietary exosomes, powered by PuriMAX™ Technology, are officially registered for global cosmetic and therapeutic applications.

GMP-Certified Facility
Exosome production under ISO 13485 and medical device GMP standards, delivering safety and consistency at every step.

14+ Intellectual Property Rights (2025)
Actively expanding our global IP portfolio with over 14 filings in 2025 focused on stem cells and exosomes.

Global Safety Testing

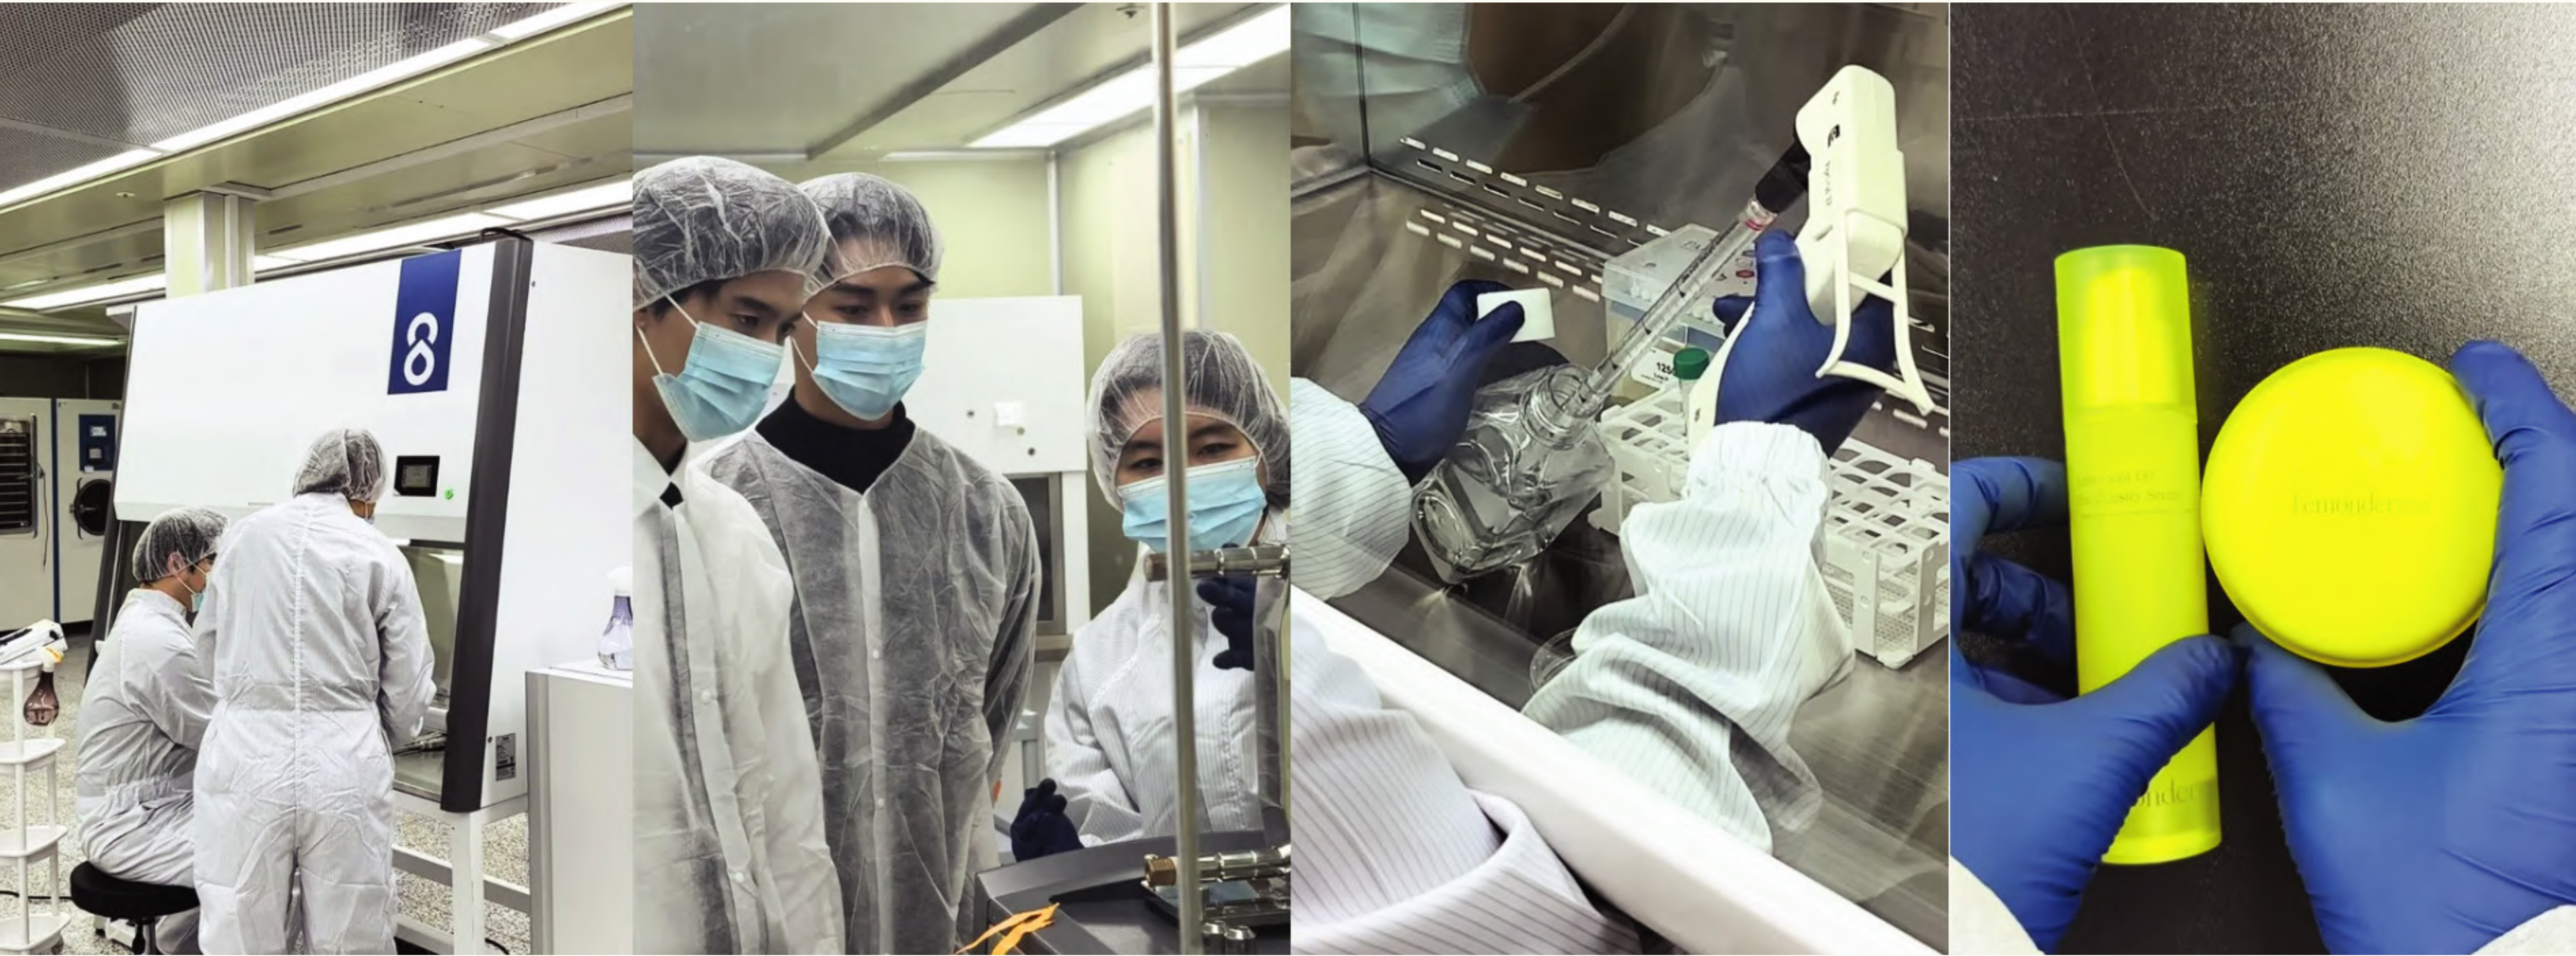

Rigorous testing for worldwide compliance and doctors in +40 countries

Dermatologists Collaboration

Formulas developed with leading skin experts

Natural High-Efficacy

Gentle yet powerful, visible results

Zishel Bio In-house Laboratory

From Our Own Exosome Laboratory
Our proprietary exosome ingredient powers every Lemonderma product – the same technology trusted by professional skincare formulations.

Pharmacy-Inspired Skincare

Trusted by Korean Pharmacies
From Seoul's pharmacies to global shelves
– Lemonderma brings Korea's pharmacy-grade skincare to the world.
